## STATES SHOULD BE PREPARED FOR THE CANAL

Of Highest Importance That Country be Ready When Great Project Is Finished.

WASHINGTON, Dec. 9.—In an address before the Southern Commercial Congress, John Barrett, Director of the International Bureau of American Republics, said, in part:

"It is of the highest importance to the South but to the whole country that we should begin to get ready for the Panama Canal. We are now actually confronted with a danger to our commerce and prestige abroad—namely, that we cannot complete the canal only to find that other countries will gain greater benefits from it than will the United States. The one great thing, therefore, that our people and Congress now should do is to set in motion such activities and policies as will place the end in hand in readiness to enjoy, and from the new routes and facilities provided by the canal. It will almost criminal lack of foresight to spend four hundred millions of dollars in digging this waterway and then sit at its completion to find that we are not in a position to utilize fully its much discussed advantages.

There are twenty-one States of the United States bordering on the high seas and the great ports from which vessels ought to steam through the Panama Canal, but hardly one of them realizes the opportunities which the canal offers, and its completion only five years ago. There should be started a 'Get Ready for the Canal' campaign which would be heard all along the Atlantic and Pacific coasts and would organize a national movement to prepare for it in a way that will be both effective and practical. Every city and commercial center having any interest in foreign commerce should accustom itself with actual trade conditions in the parts of the world to be reached by the canal. Every section of the country—especially the South—should familiarize itself, for instance, with the great West or Pacific coast of South and Central America and the possible wants and resources of those countries. Conditions of demand and capacity to sell what is desired should be ascertained, and the purchase of what is for sale, starting from the improvement of coast harbors and waterways, betterment of shipping facilities, the sending of agents abroad, study of the language, travel among these distant but future close neighbors, and acquaintance with their social and racial characteristics should have a direct and important bearing on 'getting ready for the canal.'

The Southern States abutting on the Gulf and Atlantic coasts and the States back of them have great and rich commercial opportunities before them in Latin America and South America, which in-

cludes the mighty areas of Brazil and Argentina and of other countries, let us bear in mind that there reaches directly south from Panama to Patagonia a Pacific Coast Line of five thousand miles, in the very infancy of its development, blessed with a marvelous variety of resources and climate, and one which, though comparatively isolated, is already conducting a foreign trade valued at three hundred millions of dollars per annum. In other words, the five republics of Colombia, Ecuador, Peru, Bolivia, and Chile, practically debouching on the Pacific, bought and sold in one year products equal in value to two-thirds of the entire cost of the canal. If a trade of such volume can be maintained without the canal, it is difficult to predict its valuation a few years after the canal is completed.

"Northwest from Panama is the Pacific Coast line of Central America and Mexico, with a reach of nearly three thousand miles, which will be put into direct and ultimate touch with the South when the canal is opened. This coast line from Panama to San Diego now carries on a foreign trade valued at approximately one hundred millions of dollars; it is hard to prophesy what total this will become a few years after the isthmian waterway is done.

"Speaking of all Latin America and what it offers to the South, I would have every chamber of commerce or board of trade from the Roanoke to the Rio Grande organize committees or subordinate clubs to awaken interest in everything pertaining to Latin America, to its history and development, its commerce and industries, its people, institutions and government, and then to study methods of building up exchange of trade with all parts of our sister republics and of taking advantage in a practical way of the great canal. I wish we could start a Pan-American League with branches in every important city and town of the South and supported by the best citizens of each community. Good results would surely follow both for our trade and for our influence. Such a movement—a tangible evidence to all Latin America of our growing interest in our sister republics—would accomplish wonderful results in removing any distrust and suspicion which is often described as existing among the masses of people from Mexico and Cuba south to Argentina and Chile.

"If now we can actually start a bonafide Pan-American movement in the South and popularize the cry: 'Get Ready for the Panama Canal,' we will astonish ourselves and the world with the good accomplished and develop a unanimity of sentiment in favor of a suitable celebration in 1915 which will appropriately make

## THE CENSUS REPORT SENDS COTTON UP

PRICES REACH NEW HIGH LEVELS FOR SEASON.

Buying Orders From All Parts of Country—Sixteen Cent Cotton Expected in Two Weeks.

NEW YORK, Dec. 9.—The report of the census bureau showing only 8,878,277 bales of cotton ginned to December 1, comparing with 11,008,661 to the same date last season, was followed by increased activity and considerable excitement in the cotton market yesterday morning with May contracts selling up to 15.39, or 17 points above the closing figures of Tuesday night, and at a new high record for the season.

Heavy realizing, attributed to some of the leading bulls, caused slight recessions during the morning, but there was a great volume of outside buying and the market showed a very firm tone with bulls claiming that the census figures indicated a Government estimate of under 10,250,000 bales. The commercial crop last year was in the neighborhood of 13,800,000 bales.

The market became even more active later in the day with buying orders reaching the ring from all directions while it looked as though some of the larger of the old bulls were replacing cotton which they had sold below 15 cents in expectation of 16 cents before Christmas. May contracts sold at 15.50, or \$1.40 per bale above the closing bid of Tuesday night, while August advanced to 14.95, or \$2.40 a bale. The close was steady with the general market showing a gain for the day of from 14 to 43 points.

## TAFT SHOWS CLEMENCY TO CONVICTED BANKER.

WASHINGTON, Dec. 9.—The President yesterday pardoned Frederick R. Green, former cashier of the Fredonia, N. Y., National Bank, who has served all except about nine months of a six years' sentence for making false entries. The case was unusual in that the President did not wait for a recommendation for pardon from the department of justice, the usual channel for such matters. Vice-President Sherman and several other prominent men recommended the pardon. It was represented that Green had been guilty of no personal dishonesty and that the bank was insolvent and he became responsible for it. Green has been offered a responsible position in Kansas City, Kas.

## WOMAN SUFFERED YEARS WITH SPONGE IN BODY.

MILWAUKEE, Wis., Dec. 9.—After suffering four years with a surgeon's sponge sewed up in her body, Mrs. John H. Fertig, of this city, died yesterday.

Four years ago Mrs. Fertig was operated upon for a tumor. The physicians forgot to remove a sponge from the wound. Another operation, performed in an effort to find the sponge, failed.

One year later portions of the sponge worked out through Mrs. Fertig's side. A third operation located the sponge, which was found hardened and imbedded in the woman's abdomen. This operation proved fatal.

the opening of the canal a far-reaching and historical national and international event."

The gold produced by the mines of the United States last year was valued at \$94,560,000 or just about the value of the confectionery and candy the nation consumed.

## MAN AT DEATH'S DOOR INDICTED FOR LARCENY

Alleged That George P. Sheldon Misappropriated Funds of Insurance Company.

NEW YORK, Dec. 9.—George Preston Sheldon, deposed president of the Phenix (Fire) Insurance Company of Brooklyn, lying at death's door at his Greenwich, Conn., home, was indicted for larceny in the first degree by the grand jury in New York yesterday for alleged misappropriation of funds of the company of which he was the head for twenty-two years.

As Sheldon was not arrested and probably will not be unless his health improves radically, the text of the indictment was not made public, but an official of the district attorney's office is authority for the statement that the amount which Sheldon is accused of stealing is \$45,000.

According to this official, Sheldon, it was testified before the grand jury, used the funds or credit of the insurance company in stock market transactions through a New York brokerage firm and pocketed the profits.

The grand jury will now investigate the connection of others with alleged speculation with the funds of the company.

Only charges against Sheldon have

been examined as yet, although the report of the Insurance Department implicated others.

In the meantime detectives will be sent to Greenwich to inquire into the condition of the accused man's health. If they are satisfied that he is too ill for trial, no attempt at extradition will be made, but he will be kept under close surveillance. His condition last night, as reported from Greenwich, was critical.

Four exhibits of interest which have figured in the grand jury investigations so far are three drafts for \$10,000 each and one of \$15,000, alleged profits of speculation which Sheldon is accused of having carried on. Each of these drafts is made the subject of a count in the indictment.

Sheldon is 64 years old, and widely known in insurance circles. He was taken ill with ptomaine poisoning six weeks ago, before he was deposed as president of the insurance company.

## ROME MAN FASTED TWENTY-THREE DAYS.

ROME, Ga., December 9.—After fasting for 23 days, declaring all the time that he would not allow a morsel of food to pass his lips, William Tiplin, a wealthy manufacturer of Rome, has begun to eat again. He affirmed that this would not happen until God spoke to him and gave him an appetite, but unknown to him, his family put the albumen from eggs in the water he drank. When he learned of this deception he declared it was no use to keep on fasting and began to eat. He is gaining strength rapidly, and his physicians hope for his recovery, though he is suffering from tuberculosis.

## SENTENCED TO DEATH HE KILLED HIMSELF.

COLUMBUS, Ohio, Dec. 9.—Frank Grimes, colored, who killed Blanche McKnight, with whom he was in love, hanged himself in his cell in the county jail some time Tuesday night, and his body was found Wednesday morning. He had been sentenced Tuesday to die in the electric chair on March 27.

Work still continues in Orlando for good roads. The north end of Orange avenue is being put in better condition. The entire street from the Catholic church to the standpipe has been plowed and graded and is now being rolled with the heavy steam roller.

## Salt Is More Expensive As Result of New Tariff

WASHINGTON, Dec. 9.—Salt, along with nearly every other necessity of life, has become more expensive as a result of the Aldrich-Payne-Smoot bill. Dealers are being notified that on coarse grades prices have been increased from 75 cents to \$1.25 a ton, while table and dairy grades are advanced from \$2 to \$2.25 a ton.

The approximate consumption of salt in the United States is 2,500,000 tons each year, so that if the average increase is but 50 cents a ton the trust will add \$1,250,000 to its annual profits.

A stubborn fight was made by the Democrats during the revision of the tariff at the special session for free salt, and when it was seen that was impossible, it was hoped a substantial downward revision on that schedule might be secured.

Thomas Jefferson recommended, in one of his messages to Congress, "the suppression of the duties on salt," a large portion of which duty is exhausted by the heavy expense of measuring salt.

"Salt is a necessity of life and should be as free from tax as air or water," declared Robert J. Walker, whose report on tariff and financial conditions, made while secretary of the treasury in 1845, is regarded as

containing the best tariff philosophy uttered before or since.

"Salt is used in large quantities by the farmer and planter," said Walker, "and to the poor this tax operates most oppressively, not only in the use of the article itself, but as combined with salted provisions. The salt made abroad by solar evaporation is also most pure and wholesome and as conservative of health should be exempt from taxation."

In his speech upon the tariff bill Champ Clark of Missouri declared he was not opposed to a revenue duty upon any article, save salt. "One of the greatest men that ever sat in the Senate was Thomas H. Benton," said Clark. "He fought for 26 years to have salt upon the free list. He succeeded, and President Roosevelt said he deserved the greatest credit for doing it. When Benton got salt on the free list, he said in his pompous way that he imagined he could hear the flocks and herds on a thousand hills bellowing out their love and gratitude to him for it, and they would have done it had they known what he had done for them."

The Aldrich-Payne-Smoot tariff tax on salt in bags, sacks and barrels, is 11 cents per 100 pounds, and on salt in bulk 7 cents per 100 pounds.

## Murdered Child-Wife, Then Committed Suicide

HARTISBURG, W. Va., Dec. 9.—A young farmer, killed his child wife, aged 14, and then killed himself with the same gun. The couple had been married three months.

Two days ago Mrs. Cromwell charged with the theft of her husband's clothes, which she claimed were stolen. Yesterday morning the husband induced his wife to accompany him across a field. Arriving at a point where he had secreted a shot gun, Cromwell secured possession of it, and emptied both barrels into the girl's body. The first shot almost completely tore away the head of Mrs. Cromwell. The husband reloaded the gun, and shot himself in the breast, dying soon afterward.

## KEEP FEED RECORD OF YOUR DAIRY CATTLE

THE AGRICULTURAL EXPERIMENT STATION BULLETIN

Demonstrates Importance of Such Record of Cost of Feed for Each Cow.

(By John M. Scott.)

It is doubtful if there are half-a-dozen dairymen in Florida who can tell what it costs them to produce a gallon of milk, or whether every cow in the herd produces enough milk to pay for the feed given it. These are, however, two important questions, and every dairyman ought to be able to answer them. It is just as important to know the cost of producing a gallon of milk as it is to know how to combine feeds so as to get the best results. Without the knowledge of the cost for each cow, failure will often follow. The only way to know this is to keep a daily record of the feed given and the milk produced. The excuse given by most dairymen for not keeping a complete record of their herd is that they cannot afford to do so, because it takes so much time and because labor is scarce.

### Failures in Dairying.

To make a fair profit, milk must be produced at the lowest possible cost. To do this, the dairyman must know the returns from each cow in the herd. It is not enough for him to know how much milk each cow produces, but he must know the amount and cost of the feed eaten to produce this milk. If the dairyman fails to get this information he is not likely to find dairying as profitable as he had expected. The result will often be that he will condemn the business, and say that Florida is no place for dairying, as there is no money in it. The real cause of the failure, however, the poor method of conducting the business.

### Business Methods.

Any commercial enterprise, if not conducted on business principles, will sooner or later become a failure. The first question the business man asks is, "Will it pay?" If he is convinced that a change in his methods will pay, he is apt to make the change. Dairying is just as much a business as is manufacturing or mercantile work, and it requires just as close attention to details, if the dairyman is to make a fair profit.

### Sample Records.

The following are the records of a herd of seven cows on the Experiment Station farm. These seven cows are only average dairy cows, and the results here given can be duplicated by any good dairyman in the State. All the cows were fed the same feeds, namely, 7 pounds of bran, 3 pounds of cotton-seed meal, 25 pounds of sorghum silage per day, in two equal feeds. No silage was fed after April 1, as the cows had good pasture after that date.

In the six months from January 1 to June 30, cow No. 10 produced 3868.25 pounds of milk, at a cost of 7.3 cents per gallon; cow No. 5 gave 3281.75 pounds at a cost of 8.6 cents per gallon; cow No. 2 produced 3029.5 pounds of milk, costing 9.3 cents a gallon; cow No. 13, 2633 pounds, at a cost of 10.7 cents per gallon; cow No. 4 produced 2058.25 pounds at a cost of 13.7 cents per gallon; cow No. 7, 1949.25 pounds, at a cost of 14.5 cents per gallon; and cow No. 8, 1805.25 pounds, at a cost of 15.6 cents per gallon. The average cost per gallon for the herd was 11.3 cents. The average cost per gallon for the best four cows was 8.9 cents, and the average cost for the three poorest was 14.6 cents, showing a difference in the cost of production of 5.7 cents per gallon.

These results show plainly the need of keeping a daily record, and in this way weeding out the unprofitable dairy cows.

### Comparison.

The total amount of milk produced by these seven cows in six months was 18625.25 pounds, or 2165.72 gallons. With this herd of cows it cost \$244.72 for feeds to produce this amount of milk. If all the cows in the herd had been as unprofitable as cow No. 8 it would have cost \$337.85 to produce that amount of milk; but if all had been as profitable as cow No. 10 it would have cost only \$158.10, or less than half as much. Had the entire

herd been as good milk producers as the best four cows, the 2165.72 gallons of milk would have cost \$192.75, while if the entire herd had been as unprofitable as the three poorest cows, the milk would have cost \$316.20, an increase of \$123.45, or \$17.63 per cow. These figures should be convincing enough to show the profits to be obtained by keeping a daily record of each cow in the herd.

### MR. HENDERSON'S HORSE.

His Opinion Is That Parties Who Took Same Were on a "Lark."

In speaking of the horse and buggy, the property of F. P. Henderson, which was taken from the vicinity of the First Baptist church while the owner and his wife were attending services Wednesday night and left at a point nearly a mile distant from where the property was secured, Mr. Henderson stated yesterday that he did not believe the party or parties had any intention of stealing, but that they were merely "on a lark," and used the rig for convenience.

Mr. Henderson states that he believes who the guilty parties are, and that this was not the first depredation they had committed recently. He seems rightly indignant over the matter, as it caused him considerable inconvenience and worry. While the property was delivered at the second hitching-place in as good condition as it was found, Mr. Henderson does not appreciate the motive nor the action.

## DESTRUCTION WROUGHT BY BOILER EXPLOSION

PLANT OF UNION PHOSPHATE  
CO. SCENE OF WRECK.

Without Warning Boiler Exploded,  
Causing Loss Which May Mean  
Abandonment of Plant.

A terrible explosion occurred at the plant of the Union Phosphate Company a day or two ago which completely wrecked the big plant, putting operations suddenly to a standstill. There were nearly one hundred men working at the plant when the big boiler exploded, and it was miraculous that no one was killed or injured. The Union Phosphate Company, which is owned by E. Ludwig, is located at Tioga, about nine miles west of this city, and, while the plant is not so extensive as some, it has proved an excellent and profitable proposition since Mr. Ludwig assumed the management a few years ago. A new plant had recently been opened, which was yielding nicely.

The Sun has not had the opportunity to interview Mr. Ludwig, hence his plans are not known. At any rate, the plant as it stands is a complete wreck, and it will require several weeks to place same in running order again.

Friends of Mr. Ludwig will sympathize with him in this misfortune and financial loss.

## BARREL OF LIQUOR IS CAUSING TROUBLE

IS HELD BY SHERIFF WHILE VARIOUS ORDERS ARE WORKING.

Confiscated as Property of Ben Stiles,  
But Ordered Shipped by Instruction of Court.

A barrel of whiskey and a complication of orders in the hands of Sheriff P. G. Ramsey is getting that official into all kinds of entangled predicaments, especially since the transportation companies have refused to permit Sheriff Ramsey to fulfill the instructions of the court.

At the last term of the Circuit Court Ben Stiles, an aged white man of Newberry, was arraigned upon a charge of selling liquor, when he pleaded guilty, but in consideration of the fact that Stiles had been giving the authorities previous trouble along the same line, sentence was suspended with the understanding that the defendant leave Alachua county, never to enter its borders to reside again.

This ruling suited Mr. Stiles, who agreed to leave immediately. But he explained to the court that he had a barrel of whiskey, in assorted quarts, pints and half pints, which was the property of a Jacksonville whiskey house, by reason of the fact that he had not paid for the goods. He assured the court that, should the goods be returned, proper credit would be given him, whereupon the court instructed the sheriff to ship the goods to the designated whiskey firm in Jacksonville.

So far so good, but the genial sheriff was confronted by another obstacle. When he presented the package to the transportation companies they refused to handle the same for shipment, upon the grounds that to move the package from Alachua county they would be violating the law.

Sheriff Ramsey carted the liquor back to the jail store room, where it has since remained.

After it was learned that the railroad companies would not transport the liquor beyond the limits of the county, the firm sent an order to Newberry parties for the goods, the order being addressed to the sheriff. It was presented to that official Thursday, but, acting under the instruction of the court to ship the whiskey to Jacksonville, he refused to deliver the goods on the ground that by so doing he would violate the order of the court.

The sheriff informed the bearer of the order that under no circumstances would he deliver the goods unless through an order signed by Judge Wills.

And so the matter stands. Sheriff Ramsey has the whiskey and the original instruction of the court, and he says he intends to stick to both until he sees the Judge's name affixed to an order to deliver the goods to the Newberry parties.

### TOWN DEFEATED SCHOOL.

Interesting Game of Basket Ball at Park Thursday Afternoon.

In an interesting but exciting game of basket ball between the young ladies comprising the Town and Junior School teams Thursday afternoon, the Town girls came out victorious over the Juniors by the close score of 14 to 13.

The game was witnessed by only a few, owing possibly to the cool weather, but those who did attend enjoyed the game thoroughly.

The young ladies on both sides showed their ability as players.

The line-up of the two teams was as follows:

Town Team—Irene McCreary, goal; Louise Walker, forward; Rosabel Pedrick and Pearl Colson, guards; Isla Eddins, center.

High School Juniors—Mozelle Burkhim, goal; Myrtice Dean, forward; Ruth McDonald and Miss Martini, guards; Mary Dawkins, center.

Attention.....

To the fact that everything carried in a Furniture store is on the upward tendency in price.

We are advised by all manufacturers that after December 1st all former price lists will be advanced 15 to 20 per cent.

Our stock is large. We have bought with this advance in view, and therefore we can sell you goods without putting on the advanced price. These prices can't remain very long, so we would advise all contemplating purchasers to come, send or write to the Big Furniture Store for prices. The quality of goods will show for itself.

We are getting fresh and up-to-date goods daily.

See US before buying.

Reports of a "Loeb-Root dynasty" in New York politics seems credible, at least to the custom house employees.

So far as the United States courts are concerned, it appears that Mr. Rockefeller will be permitted to keep on struggling indefinitely.

Mr. Cannon says he does not read Mr. LaFollette's speeches. It is hard to catch the Speaker's eye with type as by parliamentary methods.

It is admitted that Mr. Taft found it a little chilly in the West when he mentioned the tariff and subsidies. Wonder if he will profit by it?

Mr. Aldrich says our banking system is barbarous, but we guess it is about as good as our tariff system, which Nelse thinks is the best ever.

The Washington Herald is puzzled over the proposition, "Which is the greater man, Ty Cobb or Hoke Smith?" Oh, well, Hoke's young yet.

The Washington Herald says "Marse Henry is just about America's finest product." Taking long chances on the charge of les majesty from the lion hunter.

"A Mrs. Noah keeps a boarding-house in St. Louis," notes The Topeka State Journal. And yet if she called her establishment "The Ark," would the boarders be complimented?

Anyone who differs from the Speaker in regard to the tariff or the House rules is guilty of mental malpractice, and may not properly belong to a political organization that includes Jos. G. Cannon.

## MAKING A COUNTRY SCHOOL-HOUSE BEAUTIFUL.

Setting a school-house in a dense woods is worse than having one in an open field without trees, for the health of the pupils is promoted by having the sunshine on the house at times. But a house standing on a bare lot, without even grass around it, and often an unpainted, barn-like structure, is simply hideous. But where there is some attempt at planting it is generally in the nature of making a grove over the whole lot, and this, too, is wrong, for it prevents the growth of grass or the planting of flower-beds and shrubbery.

Trees of large size should be used mainly on the outskirts to frame in a picture of a pretty lawn and some flower-beds. Make a wide border around the building and plant it with a variety of flowering shrubbery that will bloom at different times in the season. Have a walk curving from one side of the lot past the door and out at the other side so that there can be a broad scope of grass in the center. Around the outskirts plant a variety of trees and give them room to take their natural forms, making with them a broad, irregular border to the lot, and not planting them in straight rows like an orchard. Make these trees largely evergreen, for the school is held mainly in winter, but still have some deciduous ones for their spring beauty. Then do not trim up the coniferous evergreens or the magnolias with an ugly stem, but let them branch from the ground in natural form.

Keep playground in rear and screen out the rear buildings of convenience with lattice and vines. On the outer edges of the shrubbery border around the house, which screens the base of the building, you can have fall-planted bulbs, such as hyacinths and tulips and narcissus, and follow these in summer with annual plants that the pupils are taught to raise from seed in boxes and outside. Once get the children interested in making the front of the lot beautiful and they will not damage it. Lawn mowers are very cheap now, and the lawn should be regularly mown and the grass annually top-dressed with fertilizer to promote the growth of the grass.

Now is the time for planting the deciduous trees and shrubbery, but spring will be better for the evergreens.

Then, where the long-leaf pine grows go into the woods and with a sharp spade cut under the young trees a foot or so high to cut the tap root. Then let them stand another season, and they can be moved after they have made more lateral roots. Little cedars a foot high transplant easily, as do also the little cypress trees from the swamps and they make finer trees on the dry ground than in the swamps. Hollies can be easily moved in spring, if all the leaves are pulled off, but will certainly fall if you do not remove the leaves. Magnolias also should have the leaves taken off so that the roots can get a start before the leaves evaporate the moisture too much.—W. F. Massey, in Raleigh (N. C.) Progressive Farmer.

The political assets of Senator William Lorimer of Illinois are given as one Senatorship, one seat in the National House of Representatives, and several rows of seats in the Illinois Legislature.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

That the total darkness in which the spectators of a moving picture show sit during a performance is not necessary is graphically shown by illustrations appearing in The December Popular Mechanics, showing two such amusement places in Paris where broad daylight is allowed to enter during the day and electric illumination is present at night. The two systems shown are the arrangements of two different Parisian inventors who were impelled by the knowledge that the necessity of darkness which is the most disagreeable feature of such shows, would have to be overcome before complete success were possible.

Marie Corelli says: "Englishmen prostrate themselves before American helresses because of their charm of manner." Thanks, Marie. It is too bad, nevertheless, that the prostration so seldom lasts beyond the church door and the marriage settlement.

The proposal to ask Mr. Cannon to resign is impracticable, if not absurd. The mice once unanimously agreed that the cat ought to be killed, but none would agree to put the bell upon her.

Has King Edward begun to sneer at American women since he failed to catch Mrs. Leeds and her millions for one of his pauper Dukes?

It looks as if there were going to be a first-rate chance for Mr. Cannon's 23 Democratic supporters to repent.

## MASTER'S SALE.

Notice is hereby given that under and by virtue of a final decree of foreclosure of mortgage made and rendered by the Hon. J. T. Wills, Judge of the Circuit Court, Eighth Judicial Circuit of Florida, in and for Alachua county, on the 7th day of October, 1909, in a certain cause therein pending on the chancery side of said court, wherein W. R. Thomas is complainant and L. W. Fennell, as sheriff of Alachua county, Florida, and ex-officio administrator of the estate of James E. Whaley, deceased, and William Joiner and Thomas R. Whaley et al. are defendants, and wherein and whereby the undersigned was appointed Special Master to carry out said decree, I will, on Monday, the 3rd day of January, 1910, sell to the highest and best bidder for cash, before the court house door in the City of Gainesville, Florida, between the legal hours of sale, all the right, title, interest and claim of the said L. W. Fennell as sheriff of Alachua county, Florida, and ex-officio administrator of the estate of James E. Whaley, deceased, and William Joiner and Thomas R. Whaley, in and to the following described land situated in Alachua county, Florida, to-wit:

The Northwest corner of the Northeast quarter of Section twenty-six (26), and the Northwest quarter of Section twenty-six (26) in Township nine (9), Range nineteen (19).

Together with all and singular the tenements, hereditaments and appurtenances to the same belonging or in anywise appertaining. Said sale to satisfy said decree and costs. Terms, cash.

## J. J. KNIGHTON AGAIN IN THE COUNTY JAIL

CHARGED WITH COUNTERFEIT-  
ING, WAS SURRENDERED.

Others Charged With Same Offense  
Still at Liberty Under Bond,  
To Be Tried Next Term.

J. J. Knighton, a white man, one of a number charged with counterfeiting near Newberry several months ago, and who was released under bond for his appearance at the fall term of the United States Court in this city, was brought to Gainesville and turned over to Sheriff Ramsey Thursday, his bondsmen having surrendered him. The man will remain in prison until the session of the court the latter part of the present month, unless other bond can be secured.

There were several men arrested in connection with Knighton, when all were arraigned before United States Commissioner A. M. Cushman and released upon bond. Among these was a brother of the man now in prison. All of these men, with the exception of the one referred to, are still at liberty under bond, and their cases will come up before the United States Court at the next sitting.

### CARNIVAL TO BE HERE.

Wright-Turner Aggregation of Ten  
Shows Will Entertain People.

As will be seen by announcement elsewhere, the famous Wright-Turner Shows, comprising ten big shows, will exhibit in Gainesville for one week, beginning Monday, the 13th inst.

The show grounds will be located on the Pinkoson lot, West Liberty street, which will prove most convenient.

The Wright-Turner Shows come to Gainesville with the highest recommendation for cleanliness, not a feature of the big aggregation proving objectionable.

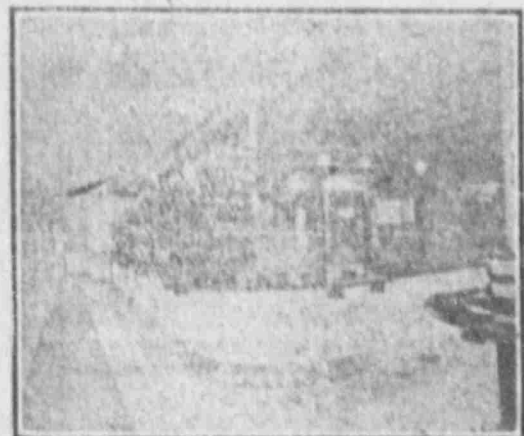

This will be the first big show of the kind Gainesville has had for several years, and it goes without saying that the venture will be well patronized. The management guarantees the best collection ever assembled in the city, some of which have never been seen here.

## MICROBES IN THE SCALP

The Latest Explanation Is That Mi-  
crobes Cause Baldness.

Professor Unna of Hamburg, Germany, and Dr. Sabourand, of Paris, France, share the honors of having discovered the hair microbe.

Baldness is not caused through a few weeks' work of these hair microbes, but is the result of conditions brought about by their presence. Baldness may not occur until years after the microbes began work, but it is certain to come sooner or later.

The microbes cut off the blood supply. They feed on the fatty matter about the roots of the hair, through which the blood is absorbed. Finally the fatty matter is consumed, the food supply of the hair is gone and it starves and finally dies.

Resorcin is one of the most effective germ destroyers ever discovered. Beta Naphthol is a most powerful, yet absolutely safe germicide and antiseptic, which prevents development of germ matter, and creates a clean, healthy condition.

Philocarpine, although not a coloring matter or dye, is an ingredient well established for its power to restore natural color to human hair when loss of color has been caused by a disease.

Borax, because of its well-defined softening and cleansing properties, is most useful in the treatment of scalp and hair disease. Glycerine acts as a stimulant to the hair bulbs, and has a soothing, healing and nourishing influence. Alcohol is indispensable in medicine because of its antiseptic, stimulating and preservative qualities.

We want everyone who has scalp or hair trouble to try Rexall "93" Hair Tonic, which contains all these ingredients. If it does not give you complete satisfaction in every particular, we will return every penny you paid us for it, for the mere asking and without question or formality.

Of course you understand that when we say that Rexall "93" Hair Tonic will grow hair we do not refer to cases where the roots are entirely dead, the pores of the scalp closed, and the head has the shiny appearance of a billiard ball. In cases like this there is no hope. In all other cases of baldness Rexall "93" Hair Tonic will grow hair, or cost the user nothing. Two sizes, 50 cents and \$1.00. Remember you can obtain Rexall Remedies in Gainesville only at our store—The Rexall Store. J. W. McCollum & Co., corner East Main and Union streets.

### Truth In Jest.

According to historical tradition, the conquest of Finland was foretold in jest that soon became earnest by its conqueror, Peter the Great, to his jester, Balakireff.

Balakireff had vexed the czar by too impudent a joke and had been summarily banished with the menacing injunction never to appear on Russian soil again. He disappeared discreetly, but one day not long after Peter, glancing out of a window, saw his unmistakable figure and quizzical countenance jogging comfortably by, perched in a country cart. Impulsively he ran down to him and demanded to know why he had disobeyed.

"I haven't disobeyed you," was the answer. "I am not on Russian soil now."

"Not on Russian soil?"

"No. This cart load of earth that I'm sitting on is Swedish soil. I dug it in Finland only the other day."

Peter laughed, but he said, "If Finland be Swedish soil now, it shall be Russian soil before long!" And he made good his words.

### His Examination Concluded.

In the evidence before a parliamentary committee concerning the opposition to a railway Hodge scored a point which accentuates a certain legal fiction with reference to skilled witnesses.

A Scotch farmer was giving his testimony in favor of the bill.

"Is it true," said the wily K. C. in his most searching style, "that you, sir, said to Mr. Guild that you were willing to give your evidence on the other side if they would pay you better?"

"Aye," said the pawky farmer, "and" (after a pause) "let me just pit the same question to ye—if ye had been offered a bigger fee, wad ye no hae been on th'ither side yersef?"

It is needless to say that the K. C. did not cross question the witness further.—Pearson's Weekly.

Keep your eye on the want ads. There may be something advertised which is of interest to you.

### THE COLD SNAP.

Came Rather Sudden, But Vegetation  
in Many Instances Benefited.

Owing to the fact that the temperature dropped very rapidly Wednesday afternoon and Wednesday night, the cold was piercingly felt, and overcoats were in evidence Thursday morning.

However, the cold snap will prove a benefit to many of the crops, especially lettuce, which had begun to head up, and growers of this vegetable were glad to welcome the change.

As was published in The Sun of Thursday, large shipments of lettuce have been made from Sanford within the past few days, but owing to the early movement the prices have been none too good. The majority of the vegetable from this section will move later, when the Northern crop is exhausted, and a better market is anticipated.

### Doubtful Praise.

A fullback in a football team once had the misfortune to put the ball through his own goal. This regrettable error lost his side the game, and he suffered agonies of self reproach on the long journey home.

"I'm no more use than a chocolate footballer," he said to his sweetheart, who had traveled many miles to see him play. "A slip of a boy from school would have shaped better than I did."

"Now, George, I won't let you say such horrid things about yourself!" declared his loyal sweetheart. "You're no idea how popular you are. I heard a gentleman praising you up to the skies this afternoon."

"Never!" emphatically exclaimed the incredulous player.

"Oh, but it's quite true!" she said proudly. "He said you'd brought his club the best bit of luck they'd had for ages, and he heartily wished you were playing against them in every match."—Exchange.

The gentlemen returned to their homes delighted with the trip and their good luck.

Pipes Frozen by Warm Spells. It is a curious fact that water pipes under ground will often freeze during the warm spell that follows a cold snap. The explanation made for this interesting phenomenon is that after a cold wave a large quantity of heat is taken from the ground in the work of changing the frozen moisture into water, and thus, on the principle of the ice cream freezer, the pipe is chilled, enough heat being taken from it to freeze it.

## DOING THEIR DUTY

Scores of Gainesville Readers Are Learning the Duty of the Kidneys.

To filter the blood is the kidneys' duty.

When they fail to do this the kidneys are sick.

Backache and many kidney ills follow;

Urinary trouble, diabetes.

Doan's Kidney Pills cure them all.

Gainesville people endorse our claim.

Mrs. V. E. Spence, 201 W. Arlington street, Gainesville, Fla., says: "It would be hard to describe how I suffered from a weak and aching back. At times the pains were so intense that I could not get up or down. I was also troubled by rheumatism and different parts of my body became stiff and lame. A friend finally advised me to try Doan's Kidney Pills and procuring a box, I began their use. I am glad to say that they lived up to representations, removing the pains and disposing of the rheumatism. I can honestly say that Doan's Kidney Pills did me more good than any medicine I had previously taken."

Remember the name—Doan's—and take no other.

special term of the circuit court to be held in Madison, beginning Dec. 20th, for the trial of the several homicide cases in that county.

J. H. Drummond, a negro, was arrested in Miami on a charge of robbing the Buena Vista postoffice, recently, and confessed. All but \$30 of the stolen funds were recovered.

Absalom Jones of Southerland committed suicide recently by sending a bullet through his heart with a rifle. Despondency over ill health was supposed to be the cause for the deed.

Five men have been caught and imprisoned in the Tampa jail, charged with implication in the burning of Mrs. Maria Acosta, the awful deed which recently occurred in West Tampa.

Knowles Hall, one of the recitation buildings belonging to Rollins College at Winter Park, was totally destroyed by fire early Thursday morning. It took heroic work to save the other buildings.

During the past two weeks Mr. Wall and his son-in-law, Mr. Hoffman, have shipped over 100 crates of tomatoes from Wulfert. A. Hunter has also shipped 11 crates of squash, 10 crates of eggplant, 14 crates of peppers and two crates of tomatoes from the same town.

An Alabama hunting party who have recently been on a hunting trip around Ft. Myers, succeeded in bringing down 10 deer, 13 wild turkeys, 5 wildcats, 4 rattlesnakes, and lots of quail, duck and snipe, besides they caught 100 fish in Rocky lake. The gentlemen returned to their homes delighted with the trip and their good luck.

Pipes Frozen by Warm Spells. It is a curious fact that water pipes under ground will often freeze during the warm spell that follows a cold snap. The explanation made for this interesting phenomenon is that after a cold wave a large quantity of heat is taken from the ground in the work of changing the frozen moisture into water, and thus, on the principle of the ice cream freezer, the pipe is chilled, enough heat being taken from it to freeze it.

Cause For Thanks. "Alas," sighed the tramp dramatically. "No matter where I turn, there's a hand raised against me."

"Which shows you ought to be thankful for one thing," said the farmer.

"What's that?"

"That it ain't a foot that's raised."

Self Possessed. Mrs. Manykinds—There is one thing about our girls—they are always self possessed. Papa Manykinds (grimly)—Yes, they're too self possessed. I wish they'd get some one else to possess them.

List's Advice. Being asked one day what one should do in order to become an efficient piano player, I just replied inventively. "One must not eat well and wash much."

Seven Rules of Life.  
Live upstairs if you wish to be in good health: "Up how many flights?" Only one flight of seven steps. I will describe them.  
First Step.—Eat wheat, oats, corn, fruits, beef, mutton, plainly cooked, in moderate quantity and but two meals a day.  
Second Step.—Breathe good air day and night.  
Third Step.—Exercise freely in the open air.  
Fourth Step.—Retire early and rise early.  
Fifth Step.—Wear flannel next your skin every day of the year and so dispose your dress that your limbs may be kept warm. Bathe frequently.  
Sixth Step.—Live in the sunshine. Let your bedroom be one which receives a flood of light and spend your days either out in the sunlight or in a room which is well lighted.  
Seventh Step.—Cultivate a cheerful temper. Seek the society of jolly people. Absolutely refuse to worry and, above all, don't be afraid to laugh. Live above. Sickness cannot crawl up there. Disease prowls about in the basement. Rarely does it get upstairs.
